

Would it be better to do something like:

```
If (x > 10)
Return false
else if (x<8)
X = something
else if (x= 5)
X = something2
```

Or would it be better to go:

```
if (x= 5)
X = something
else if (x<8)
X = something2
else if (x > 10)
Return false
```
